

OMNI 3750 IP TERMINAL

Sleek and stylish, VeriFone's Omni 3750 Dual-Com IP packs all the features and functions merchants could want into a single, stand-alone terminal. It can quickly and efficiently process Credit Cards, Debit Cards, Electronic Benefit Transfer, Electronic Check Service and Electronic Gift Card transactions.

Roughly the size of a check book, it will fit virtually anywhere. The ATM style graphical customer interface and integrated thermal "drop in paper" printer make this terminal extremely easy to learn and use.

VeriFone Omni 3750 Features:

Supports credit, debit, electronic benefits transfer (EBT), and electronic check transactions, and smart card-based payments

Intuitive, ATM-like graphical user interface with screen-addressable function keys

Sleek, compact design minimizes clutter and saves counter space

Provides large backlit display

Triple-track card reader supports all magnetic-stripped cards, including new drivers' licenses

Integrated thermal printer is exceptionally quiet and fast

Comprehensive, easy-to-read reports

Two telephone ports eliminate the need for a second line

Attach a wide range of peripherals

The all-in-one Omni 3750 terminal features an array of interchangeable communications modules supporting 2400bps, 14.4Kbps, Ethernet or ISDN technologies.

VeriFone is further extending its lead in the IP-enabled terminal space this year by adding CDMA, GPRS and Wi-Fi wireless technologies to the list of upgrade options soon to be available for the Omni 3750. These new 3G wireless solutions fully leverage the terminal's modular architecture and existing base of IP-enabled applications.
