

HYPERCOM OPTIMUM T4100 TERMINAL

The Hypercom Optimum T4100 is perfect if you are looking for speed, flexibility and security. The Hypercom Optimum T4100 is one of the few terminals to support both Ethernet and dial connections.

The Hypercom Optimum T4100 pushes the envelope in speed, integration and security. It features the Intel X-Scale 32-bit processor and IP Connection for lightning fast transactions. The Optimum T4100 uses true SSL for unsurpassed security and features integrated IP diagnostics with and integrated help system.

Provides IP capabilities with built-in dial backup

Prints 18 lines per second

Ultra-Fast Transactions using Internet Protocol (IP)

True Multi-Application Processing

The Optimum T4100 is truly unique for our industry - the first terminal that cost-effectively combines performance, security, reliability, and ease of use. These elements are the cornerstone of our Optimum family.

Fast downloads and transactions via an integrated 56K modem or secure Ethernet connection reduces communications costs and downtime

Wizard-style user interface with an embedded help system for terminal configuration allows for faster and more accurate terminal deployment.

Meeting all of your point-of-sale needs!

SETTING THE STANDARD FOR QUALITY
