HYPERCOM T77 TERMINAL

The Hypercom T77 compact, high-performance terminal supports a wide range of applications including credit, debit and stored-value cards, as well as check and proprietary card processing.

It is ideal for retail environments requiring very fast transaction times, for upgrading existing authorization-only equipment or for merchants moving to debit applications.

Space-Saving High Performance

The Hypercom T77 compact, high-performance terminal supports a wide range of applications including credit, debit and stored-value cards, as well as check and proprietary card processing. It is ideal for retail environments requiring very fast transaction times, for upgrading existing authorization-only equipment or for merchants moving to debit applications.

Multiple Printer Options

The integrated, high-speed printer on the T77 is available in thermal, sprocket or friction types. All modules are easily replaceable and eliminate reliability problems. The sprocket printer option allows the T77 to print transaction-specific information inside preprinted, multi-part retail vouchers for high-quality, professional cardholder receipts.

Additional Benefits

Specific price/performance benefits for the T77 include savings on user training, reduced telephone line costs, shorter processing and shorter settlement times. It features a broad range of telecommunications, display, keypad, card reader and system connectivity options that enable it to meet the demands of a sophisticated, ever-changing marketplace.
